Education

Stony Brook University

September 2019 - May 2023

Bachelor of Science in Computer Science - Dean's Honor List (3.6 GPA)

Stony Brook, NY

- **Relevant Coursework:** Software Engineering, Scripting Languages, Algorithm Design, Computer Networks, Natural Language Processing, Machine Learning, Data Science, Mobile Applications

Certification: ISTQB Certified Tester – Foundation Level (CTFL), Issued 2025

Work Experience

Zebra Technologies

October 2020 – Present

Quality Technician I

Hauppauge, NY

- Conduct manual testing and validation of Zebra scanner devices to ensure compliance with company quality standards and customer requirements.
- Configured and loaded correct software builds for 50,000+ scanners during peak season, meeting tight deadlines while prioritizing efficiency and accuracy.
- Developed internal quality-control documentation, including standardized checklists for scanner validation and access point setup, improving consistency across the team.
- Managed scanner status and configuration history in Zebra's OMIS inventory system, ensuring traceability, compliance, and streamlined audits.

Projects

Chirp - Bird Watching App | *Source Code*

Flutter | Flask | Firebase

- **Led development** of a multi-platform application for logging bird sightings and uploading pictures, enhancing user experience with **seamless data collection and sharing**.
- Structured app using **modular architecture** with Firebase backend for scalable user and data management.
- Integrated Google Maps API to offer **interactive maps**, enabling users to visualize sightings geographically and explore nearby hotspots.

Sheet2App | *Source Code*

ReactJS | NodeJS | MongoDB

- **Led a team of 4** in developing a user-friendly application using Agile methodology, enabling users to import spreadsheets and create applications without coding expertise.
- Worked full-stack on the application, **integrating the Google Sheets API** and optimizing query efficiency by **60%**, resulting in faster application performance.
- Utilized team strengths to assign tasks, ensuring **on-time project delivery** and effective deadline management throughout the **Software Development Lifecycle**.

StackOverflow Clone | *Source Code*

ReactJS | NodeJS | MySQL

- Developed a **Stack Overflow clone solo**, managing **full-stack development** and setting personal deadlines for project milestones.
- **Implemented core features** such as user profiles, question/answer functionality, and upvoting, while maintaining and optimizing a MySQL database with complex queries for **efficient data management**.
- Designed intuitive UI for seamless user experience, implementing upvoting, search filters, and Q&A interaction flows.

Technical Skills

Languages: JavaScript, TypeScript, Kotlin, Python, Java, Dart, SQL, HTML, CSS

Frameworks & Tools: React, NodeJS, Flutter, Firebase, Docker, Selenium, Postman, GitHub, Spring Boot

Databases: MySQL, PostgreSQL, MongoDB

Concepts: UX/UI Design, Responsive Design, Object-Oriented Programming, Agile, REST APIs, Debugging, Unit Testing
